Jen

Jennifer is a treatment coordinator at EON Clinics. She has helped hundreds of patients find their new smile by developing personalized treatment plans to meet their specific needs.

Can I Afford Dental Implants?

Hi! I'm Jennifer, a treatment coordinator at EON Clinics in Waukesha. Many people who want dental implants worry about the cost. We treatment coordinators work to create a customized care plan that fits your needs, as well as find ways for you to finance your treatment

How much are dental implants?

Dental implant costs vary depending on the condition of your mouth and the type of work that needs to be done. That being said, here is the average cost of dental implants at an all-in-one center. These costs come from our financial partners below and may require a down payment:

- Single Tooth Implants - \$174/month (avg.)
- One jaw, Upper or Lower - \$346/month (avg.)
- Full Mouth All-On-4 - \$692/month (avg.)

It is certainly an investment, but you'll reap the benefits every single day. With proper care and maintenance, dental implants can last a lifetime. EON Clinics also offers affordable payment plans with zero to low interest for those who qualify.

Why do dental implants cost so much?

At EON Clinics, the cost of dental implants is all-inclusive with no hidden fees. Your treatment cost covers a variety of expenses:

- Oral surgeon fees
- Prosthodontist fees
- Custom-fabricated temporary and permanent prostheses
- Material costs
- Anesthesia related costs
- Any included medications
- Post-surgical follow-up appointments
- 3-D CT scan imaging

You will live with the outcome of your smile transformation for the rest of your life, and you truly do get what you pay for. Our patients repeatedly say that they were grateful to choose the highest quality care and a lifetime solution. Their only regret? Not doing it sooner!

Is it safe to get cheap dental implants outside of the U.S.?

Dental tourism can be an affordable way to receive treatment that would otherwise be out of budget, but a limited budget is all the more reason not to gamble with your health and savings. EON Clinics doctors continually are fixing teeth that were poorly placed elsewhere at a cheap price.

Often times, we see patients spending even more to fix the smile they initially thought would save them money. As such, we highly advise against dental tourism. Read more on the [dangers of dental tourism](#).

Can you finance dental implants?

Yes! We offer financing through [LendingClub](#), [CareCredit](#), [GreenSky](#), and [Proceed Finance](#). When you come in for your free consultation, we'll see if you qualify for financing and payment plans.

We'll also check your insurance plan to see if your plan provides coverage for a portion of the procedure. We'll assist you with the entire process, making it as easy as possible to pay for your implants.

What dental implant payment plans do you offer?

We offer a variety of 0% and low interest payment plans to help you fund your dental implant procedure. Our treatment coordinators are happy to assist you with the entire process at your free consultation. You'll find out the loan amount you're approved for, your interest rate, and repayment terms. We'll also provide your exact treatment cost and plan, so you can budget for your procedure.

"Hi! I'm Nick, your Dental Implants Expert!"

I'm a dental implants expert at EON Clinics. I created this guide to help people through the biggest questions along their journey.

Dr. Suzie Ahn

Dr. Suzie Ahn is a board certified surgical prosthodontist working at EON Clinics.

What is the Dental Implant Process Like?

Hi, I'm Dr. Ahn, here to help explain the process of getting dental implants. I've performed this procedure for hundreds of EON patients! Let's start by going over some of the biggest questions my patients ask about the process.

What are the benefits of an all-in-one clinic?

From start to finish, your dental implant procedure will be handled by one team of staff in one location. Many general dentists and clinics that offer dental implants do not have a lab onsite; this means they must rely on an outside prosthodontist and technicians.

By offering everything in-house, EON Clinics is able to deliver your new smile faster, while maintaining the highest level of service and quality. At our clinic, you'll find the oral surgeons who place the dental implants, prosthodontists who specialize in tooth replacement, the dental implant laboratory, and 3-D CT scanner all in one place.

How is the dental implant procedure performed?

Many patients are fearful of the process at first, but we assure you, it's quick and relatively painless! You may stay awake during the procedure or opt to be put under general anesthesia, whichever is most comfortable for you. Your doctor will surgically insert a dental implant into your jawbone. Four implants are inserted to support a full arch of teeth. Meanwhile, your temporary teeth are crafted at our onsite lab. These temporary teeth are then attached to the implants with a connector.

You'll leave the day of your surgery with a set of temporary teeth that look natural. Once your jaw has healed, we'll replace your temporary teeth with a permanent bridge that looks, feels, and functions just like real teeth! This final appointment takes less than an hour and does not require surgery. At this point, you'll be able to eat anything you'd like!

How long does a dental implant procedure take?

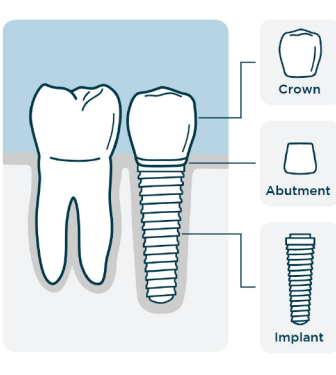

A single tooth implant can be placed in less than 30 minutes and multiple tooth implants can take up to an hour. A full jaw, also known as an All-on-4, could take 2-3 hours. We'll cover all of the details with you prior to your appointment.

Procedure Timeline for All-on-4 Full Jaw:

From start to finish, the entire dental implant process for an All-on-4 full jaw takes about 8 months. Most of that time is spent allowing the implants to fuse to the jaw bone while wearing your temporary teeth. Like any surgery, your healing period may be shorter or longer based on individual healing factors.

Is dental implant surgery painful?

Our patients are often surprised by how quick and uneventful the procedure actually is. Your pain will very likely be minimal; most patients report pain at a level of 2 on a scale of 1 to 10. Pain tolerance varies by patient but our care team is here to assist and provide comfort with pain medication if needed. We'll make sure you're comfortable from start to finish.

Anatomy of a Dental Implant

Dental implants are artificial tooth roots that are permanently anchored to the jaw bone. They are the ideal replacement solution for missing or failing teeth due to their strength, longevity, and completely natural appearance and feel. There are three main parts of the dental implant:

- The Crown**
This is the new replacement tooth. Your crown will be custom-made to seamlessly match your natural teeth in color, size, and shape.
- The Abutment**
An implant is a screw-like post that creates a stable base for your new tooth. The implant is permanently attached to the jaw bone.
- The Implant**
An implant is a screw-like post that creates a stable base for your new tooth. The implant is permanently attached to the jaw bone.

Dental Implant Treatment Timeline

Pre-Procedure Exam

We'll gather all the necessary records to custom craft your new teeth. Our care team will put your mind at ease by answering all your questions.

Your Free Consultation

Receive a free 3-D CT Scan and meet with a doctor to learn about the best treatment options for your mouth. We'll walk you through the entire process, provide your exact cost, and review payment plans.

Dental Implant Procedure

Your prosthodontist and oral surgeon will ensure your comfort as they safely place the dental implants and attach your temporary teeth. You'll leave the same day with a new smile. After the procedure, your jaw will heal as we custom design your permanent teeth.

Lab Tech Engineers Your Custom Teeth

Our skilled lab techs craft your permanent teeth using the latest dental technology at our in-house lab. Working closely with your prosthodontist, our lab techs can design and deliver your prosthesis quickly and efficiently.

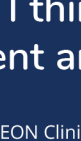

Post-Procedure Checkups

As your jaw heals, we'll check the bite, fit, and appearance of your permanent teeth at these try-in appointments. You'll get to choose the shape, size, and shade of your teeth.

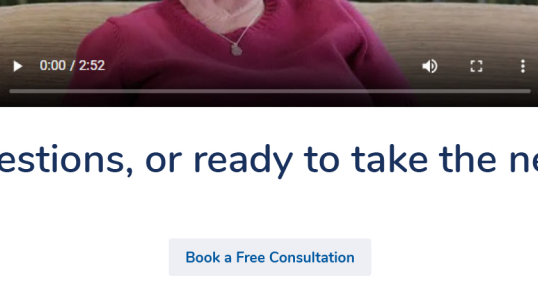

New Permanent Teeth

It's the big day! You'll receive your permanent smile and complete the transformation you've been dreaming of. Get back out there and enjoy life again!

I'm back to being me. I think that's probably the greatest improvement anyone could ask for.

- Debbie, EON Clinics Patient
