

The Health Benefits of Dental Implants

Bite down on these stats—all of which have to do with dental implants, tooth loss, nutrition, and risk of disease.

TOOTH LOSS

26% One-quarter (26%) of people aged 65 and over have eight or fewer teeth.

One in every six (17%) people aged 65 and over has lost all of their teeth.

68% Gum disease affects over two-thirds (68%) of adults aged 65 and up.

SUCCESS AND LONGEVITY OF IMPLANTS

95%

Dental Implants have a 95% success rate.

Most dental implants will last 15 years or more.

98.9% AT THREE YEARS

98.5% AT FIVE YEARS

96.8% AT TEN YEARS

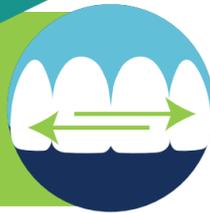

94.0% AT FIFTEEN YEARS

DENTAL IMPLANTS IMPROVE ORAL HEALTH

30% 30% bone loss can occur within 6 months of losing a tooth. Implants stop bone loss and resorption.

STOP shifting teeth. Missing teeth can cause teeth to move but implants can stop that process.

12 YEARS Patients with severe chronic periodontitis found well-maintained implants prevented gum disease from returning, even after 12 years.

A 2019 study found that dental implants could actually improve speech within 4 months of the implant process.

4 MONTHS

MENTAL HEALTH IMPROVEMENT

94%

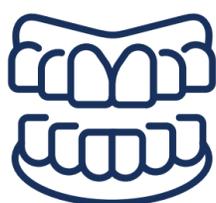

94% of those surveyed, were happier with their appearance after their dental implant procedure. They saw improvements in:

- sagging skin
- sunken appearance
- collapsed cheeks
- bite misalignment

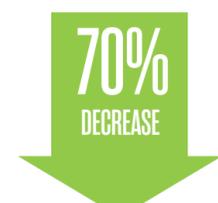

DENTAL IMPLANTS IMPROVE BITE FORCE

DENTAL IMPLANTS

Implants **improves bite force** by almost 100%. Bite force, on average, can go from 80-122N to 167-235N.

DENTURES

Dentures are found to **decrease bite force** by 70-75%. Difficulty eating hard, chewy foods.

BETTER NUTRITION ACHIEVED WITH DENTAL IMPLANTS

85%

Dental implant patients, found on average, they were able to improve their diets by eating more nutritious foods like produce, that were difficult to manage before implants.

Enjoy favorite foods you love like steak, pizza, apples and hard foods.

LONG TERM BENEFITS OF IMPLANTS

Dentures last 5-7 years and cause bone loss, oral health problems. Bridges last 7-10 years and cause bone loss, decay of surrounding teeth. Implants last a lifetime with 95% success and stop bone loss.

After chewing all the facts, you can see that implants can stop long-term issues, lead to a happier, healthier life, and give you the bright, gorgeous smile you have always wanted.
